THE WORDS AROUND ME

Activity instructions

During the time you are in the car, make a list of 10 words you see on signs around you. They might be names of towns, names of shops or cafes, or they might be road safety signs. Basically, if you see a word written down, you can also write it down in the space below.

When you have a list of 10 words (it doesn't have to be the first 10 you see. You can choose whether or not to record a word), use those words to fill in the Word Find on the following page.

Simply, write your list again at the bottom of the page, being careful with your spelling, and then write the letters into spaces in the grid.

Fill the remaining spaces with other, random letters
and then your word find is ready for someone else to solve.
